MC4 Launches New Online Photo Gallery

MC4 is proud to present its new online photo gallery!

You can access the new gallery by visiting www.mc4.army.mil and clicking on the "News" link, where you can follow the navigation to the **Photo Gallery**.

To visit the MC4 photo gallery directly, [click here](#).

We are welcoming new additions to the MC4 photo gallery, so feel free to send pictures to the [MC4 public affairs office](#).

Medical Communications for Combat Casualty Care (MC4) develops, fields and supports a medical information management system for Army tactical medical forces, enabling a comprehensive, life-long electronic medical record for all service members, and enhancing medical situational awareness for operational commanders.

Since its inception in 1999, MC4 has deployed more than 9,000 MC4 systems to 250+ medical units for contingency operations supporting Operation Iraqi Freedom. As a result, more than 100,000 medical encounters have been transmitted from the battlefield to the United States using MC4. MC4 has also trained more than 10,000 deployable medical and ancillary personnel, and maintains a 24-7 customer support structure throughout the world. Headquartered at Fort Detrick, Md., MC4 is under the oversight of the Army Program Executive Office Enterprise Information Systems (PEO EIS) at Fort Belvoir, Va.

For more information on MC4, visit www.mc4.army.mil.
